

# COVID-19 Testing for Kids & Families

**STAY SAFE MN**

We are excited to join each other in person again! For the safety of our staff and your children, we encourage all families to get tested for COVID-19. The Minnesota Department of Health recommends that school-age children who spend time near people who do not live in their home get tested every two weeks through the end of the school year. You can visit a community testing site (saliva testing), order an at-home test kit (saliva testing), or get tested through your health care provider. All options are quick, easy, and free to you. Visit [Getting Tested for COVID-19](#) or contact your health care provider to schedule an appointment. Community Testing sites near us: Crookston Armory, check the link above for testing days and times.
